THE

AMERICAN

JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS JOSIAH P. COOKE, GEORGE L. GOODALE AND JOHN TROWBRIDGE, OF CAMBRIDGE,

PROFESSORS H. A. NEWTON AND A. E. VERRILL, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XXXV.—[WHOLE NUMBER, CXXXV.]

Nos. 205—210.

JANUARY TO JUNE, 1888.

PUBLIC LIBRARY
DETROIT, MICH.
SEP 7 1888

WITH VII PLATES.

NEW HAVEN CONN.: J. D. & E. S. DANA.
1888.

R v. 135 Jan. - June 1888

Ref

Tuttle, Morehouse & Taylor, Printers,
371 State st., New Haven, Conn.

CONTENTS OF VOLUME XXXV.

Number 205.

Page

ART. I.—Speed of Propagation of the Charleston Earthquake; by S. NEWCOMB and C. E. DUTTON 1

II.—History of the changes in the Mt. Loa Craters; by J. D. DANA. Part I. Kilauea. (Plate I). 15

III.—Analysis and Composition of Tourmaline; by R. B. RIGGS 35

IV.—Different types of the Devonian System in North America; by H. S. WILLIAMS 51

V.—Law of Double Refraction in Iceland Spar; by C. S. HASTINGS 60

VI.—Notice of a New Genus of Sauropoda and other new Dinosaurs from the Potomac Formation; by O. C. MARSH 89

VII.—Notice of a New Fossil Sirenian, from California; by O. C. MARSH 97

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Decomposition of the Hydrides of the Halogens by Light in presence of Oxygen, RICHARDSON, 73.—Influence of Liquid water in promoting the decomposition of Hydrogen chloride, ARMSTRONG, 74.—Concentration of Solutions by Gravity, GOUY and CHAPERON, 75.—Percentage of Oxgen in the Air, HEMPEL: Constitution of Selenous Acid, MICHAELIS and LANDMANN: Indexing of Chemical Literature, 76.—Mechanical Equivalent of Heat, DIETERICI: Radiation in absolute measure, BOTTOMLEY: Maximum of Light Intensity in the Solar Spectrum, MENGARINI, 77.—Relation of the wave-length of light to its intensity, EBERT: Brief notice of a paper by Mr. Hallock, SPRING, 78.—Lessons in Elementary Practical Physics, STEWART and GEE, 79.

Geology and Natural History.—Communication by Raphael Pumpelly, 79.—Geological history of the Swiss Alps, 80.—Gradual variation in intensity of metamorphism, 82.—Mission Scientifique du Cap Horn, 83.—The American Geologist: Geology and Mining Industry of Leadville, Colorado, S. F. EMMONS: Fifteenth Annual Report on the Geological and Natural History Survey of Minnesota, N. H. WINCHELL, 84.—New York Paleontology: Annual Report of the Geological Survey of Pennsylvania: Fossil Mammals from the White River formation contained in the Museum of Comparative Zoology, W. B. SCOTT and H. F. OSBORN, 85.—Diatomaceous Earth in Nebraska: The Upper Beaches and Deltas of the Glacial Lake Agassiz, W. UPHAM; Supposed diamonds in a Meteorite: Cryptolite: Grundriss der Edelsteinkunde, P. GROTH: Rivista di Mineralogia e Cristallografia Italiana, R. PANEBIANCO: Catalogue of all recorded Meteorites, O. W. HUNTINGTON, 86.—A chapter in the History of Meteorites, W. FLIGHT: Das pflanzenphysiologische Praktikum, DETMER, 87.

Miscellaneous Scientific Intelligence.—Proceedings of the Colorado Scientific Society: Relative Proportions of the Steam Engine, W. D. MARKS: Modern American Methods of Copper Smelting, E. D. PETERS, 88.

Obituary.—FERDINAND V. HAYDEN, 88.

Number 206.

Page

ART. VIII.—Seismoscopes and Seismological Investigations; by T. C. MENDENHALL 97

IX.—Petrographical Microscope of American Manufacture; by G. H. WILLIAMS 114

X.—New Ammonite which throws additional light upon the geological position of the Alpine Rhætic; by W. B. CLARK 118

XI.—Three Formations of the Middle Atlantic Slope; by W. J. McGEE. (With Plate II) 120

XII.—Experiments with the Capillary Electrometer of Lippmann; by J. H. PRATT, Jr. 143

XIII.—Period of the Rotation of the Sun as determined by the Spectroscope; by HENRY CREW 151

XIV.—Theory of the Bolometer; by H. F. REID 160

XV.—Are there Deep-Sea Medusæ? by J. W. FEWKES 166

Obituary.—FERDINAND V. HAYDEN, 179.

Number 207.

Page

ART. XVI.—Asa Gray; by J. D. DANA 181

XVII.—Calibration of an Electrometer; by D. W. SHEA 204

XVIII.—On the so-called Northford, Maine, Meteorite; by F. C. ROBINSON 212

XIX.—History of the Changes in the Mt. Loa Craters; by JAMES D. DANA 213

XX.—The Taconic System of Emmons, and the use of the name Taconic in Geologic nomenclature; by CHAS. D. WALCOTT, of the U. S. Geological Survey 229

XXI.—On the crystalline form of Polianite; by EDWARD S. DANA and SAMUEL L. PENFIELD 243

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Stalagmometer and its use in quantitative analysis, TRAUBE, 248.—Apantlesis, a Separation of the Constituents of a Solution by Rise of Temperature, MALLET: Properties of Fluorine, MOISSAN, 249.—Oxygen Carriers, LOTHAR MEYER: Atomic Weight of Zinc, REYNOLDS and RAMSAY, 250.—Text-book of Inorganic Chemistry, VICTOR VON RICHTER, EDGAR F. SMITH: Manual of Analytical Chemistry, JOHN MUTER: New instrument for measuring heat, WEBER, 251.—Velocity of Sound, A. W. RUCKER: Transmission of power by alternating electrical currents, T. H. BLAKESLEY: Measurement of Electromotive Forces, WILLIAM THOMSON: Influence of Magnetism on the Thermo-electric behavior of Bismuth, GIOVANNI PIETRO GRIMALDI: Coincidences between lines of different Spectra, 252—Influence of thickness and luminosity of light-producing layers, upon the character of Spectra, EBERT: Measurement of force of gravitation, M. DEFFORGES: Influence of temperature on Magnetization, 253.

Geology and Mineralogy—Note respecting the term Agnotozoic, T. C. CHAMBERLIN, 254.—Contributions to the Paleontology of Brazil, CHARLES A. WHITE: Arkansas Geological Survey: Fossils of Littleton, New Hampshire: Palæolithic Man in Northwest Middlesex, J. A. BROWN, 255.—Organization of the Fossil Plants of the Coal Measures, W. C. WILLIAMSON: Catalogue of the Fossil Mammalia in the British Museum, R. LYDEKKER: Geological Evidences of Evolution, A. HEILPRIN, 256.—Kilauea: Allgemeine und chemische Geologie, J. ROTH: Mineral Resources of the United States, D. T. DAY Native Platinum from Canada, G. C. HOFFMANN, 257.—Shepard Collection of Minerals: Natural Gas, 258.

Botany—Respiratory Organs of Plants, L. JOST: Combination of the Auxanometer with the Clinostat, ALBRECHT, 258.—Die natürlichen Pflanzenfamilien, A. ENGLER and K. PRANTL, 259.—Botanical Necrology for the year 1887, 260.

Miscellaneous Scientific Intelligence — Hann's Meteorological Atlas, 263.—New Meteorites, 264.

Number 208.

Page

ART. XXII.—The Absolute Wave-length of Light; by L. BELL. Part I 265

XXIII.—History of the changes in the Mt. Loa Craters; by J. D. DANA. (With Plates IV and V) 282

XXIV.—The Electromotive Force of Magnetization; by E. L. NICHOLS and W. S. FRANKLIN 290

XXV.—Notes on certain rare Copper Minerals from Utah; by W. F. HILLEBRAND and H. S. WASHINGTON 298

XXVI.—The Taconic System of Emmons, and the use of the name Taconic in Geologic nomenclature; by C. D. WALCOTT. (With Plate III) 307

XXVII.—Three Formations of the Middle Atlantic Slope; by W. J. MCGEE 328

XXVIII.—Diorite Dike at Forest of Dean, Orange County, N. Y.; by J. F. KEMP 331

XXIX.—New Lecture Apparatus for determination of Reflection and Refraction; by W. L. STEVENS 332

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Spectrum of the Residual Glow, CROOKES, 334.—Presence of Chlorine in Oxygen prepared from Potassium chlorate, BELLAMY: Interaction of zinc and sulphuric acid, MUIR and ADIE, 335.—Organic Analysis, A. B. PRESCOTT: Practical Physics, B. STEWART and W. W. H. GEE, 336.—Spectrum of the oxyhydrogen flame, G. D. LIVEING and J. DEWAR: Application of the Electrolysis of Copper to the Measurement of Electric Currents, GRAY: Influence of light upon electrical discharges: Wave-lengths of standard lines, F. KURLBAUM, 337.

Geology and Natural History.—Distribution of strain in the Earth's crust resulting from secular cooling, C. DAVISON and G. H. DARWIN, 338.—Lavas of Krakatoa: Geologie von Bayern, K. W. VON GÜMBEL: Recent contributions to our knowledge of the vegetable cell, 341.

Miscellaneous Scientific Intelligence.—Beiträge zur Geophysik, G. GERLAND, 344. Klima und Gestaltung der Erdoberfläche in ihrer Wechselwirkung dargestellt von J. PROBST: Beobachtungs-Ergebnisse der Norwegischen Polarstation Bossekop in Alten, A. S. STEEN: The Asteroids, or Minor Planets between Mars and Jupiter, D. KIRKWOOD: Manual of Descriptive Geometry, C. A. WALDO, 345 —Annals of the Astronomical Observatory of Harvard College, E. C. PICKERING: Movements of the Earth, J. N LOCKYER: Publications of the Lick Observatory of the University of California, E. S. HOLDEN: Cordoba Observations: Elemeutary Treatise on Analytical Mechanics, W. G. PECK, 346.

Obituary.—JAMES C. BOOTH, 346.

Number 209.

Page

ART. XXX.—The Absolute Wave-length of Light; by LOUIS BELL. Part II 347

XXXI.—Three Formations of the Middle Atlantic Slope; by W. J. McGEE. (With Plates VI and VII) 367

XXXII.—On some peculiarly spotted Rocks from Pigeon Point, Minnesota; by W. S. BAYLEY 388

XXXIII.—The Taconic System of Emmons, and the use of the name Taconic in Geologic nomenclature; by CHAS. D. WALCOTT 394

XXXIV.—Terminal Moraines in North Germany; by Professor R. D. SALISBURY 401

XXXV.—Note on the Viscosity of Gases at High Temperatures and on the Pyrometric use of the principle of Viscosity; by CARL BARUS 407

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Boiling-point and molecular formula of Stannous chloride, BILTZ and VICTOR MEYER: Occurrence of Germanium in Euxenite, KRÜSS, 410.—Double Acetate of calcium and copper, RÜDORFF: Ueber die Reaktionsgeschwindigkeit zwischen islandischem Doppelspat und einigen Säuren, W. SPRING: Integral Weight of Water, T. S. HUNT, 411.—Absorption Spectra, FR STENGER. 412.—Wave-length of the two red lines of potassium: Explosion of gases, A. von ŒTTINGEN and A. von GERNET: Dust particles in the Atmosphere, JOHN AITKIN, 413.—Magnesium and Zinc. HIRN: Gravity, 414.

Geology and Mineralogy—Geology: Chemical, Physical and Stratigraphical, J. PRESTWICH, 414.—Level-of-no-strain and mountain making: Geology of Rhode Island; Franklin Society Report: Annual Report for 1886 of the Geological Survey of Pennsylvania: Annuaire Géologique universel, Revue de Géologie et Paléontologie. 415.—The Geological Record for 1879, W. WHITAKER and W. H. DALTON: Manual of the Geology of India, Part IV, Mineralogy, F. R. MALLET: Brief notes on recently described minerals, 416.—Note on Xanthitane, L. G. EAKINS, 418.

Botany and Zoology—Recent contributions to our knowledge of the vegetable cell, LOEW and BOKORKY, 419.—Garden and Forest, C. S. SARGENT: Bibliotheca Zoologica, 420.—Report on the Annelids, of the Dredging Expedition of the U. S. Coast Survey Steamer "Blake," E. EHLERS, 424.

Miscellaneous Scientific Intelligence—National Academy of Sciences, 424.

Obituary—OSCAR HARGER, 425.—JULES-EMILE PLANCHON, 426.

Number 210.

Page

ART. XXXVI.—Note on Earthquake-Intensity in San Francisco; by E. S. HOLDEN 427

XXXVII.—Relation of the Laramie Group to earlier and later Formations; by C. A. WHITE 432

XXXVIII.—The Gabbros and Diorites of the "Cortlandt Series" on the Hudson River near Peekskill, N. Y.; by G. H. WILLIAMS 438

XXXIX.—Three Formations of the Middle Atlantic Slope; by W. J. MCGEE 448

XL.—Comparison of the Elastic and the Electrical Theories of Light with respect to the Law of Double Refraction and the Dispersion of Colors; by J. W. GIBBS 467

XLI.—Notes on the Surface Geology of Southern Oregon; by H. J. BIDDLE 475

XLII.—Some Nickel Ores from Oregon; by F. W. CLARKE. 483

XLIII.—Note on the Secondary Enlargement of Augites in a Peridotite from Little Deer Isle, Maine; by G. P. MERRILL 488

XLIV.—New Meteorite from the San Emigdio Range, San Bernardino County, California; by G. P. MERRILL 490

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Relative Size of Molecules, 492.—Chemical Decomposition produced by Pressure, SPRING and VAN'T HOFF, 493.—Vapor-density of Ferric Chloride, GRUNEWALD and VICTOR MEYER, 494.—Application of interference fringes to Spectrum Analysis, H. EBERT: Penetration of light beneath the surface of water, F. A. FOREL: Velocity of Sound, J. VIOLLE and TH. VAUTIER: Magnetism and diamagnetism of gases, 495.

Geology and Mineralogy—Three Cruises of the United States Coast and Geodetic Survey Steamer Blake in the Gulf of Mexico, in the Caribbean Sea, and along the Atlantic Coast of the United States, A. AGASSIZ, 495.—Descriptions of new Fossil Fishes, J. S. NEWBERRY, 498.—Natural History of New York, Palæontology, J. HALL, 499.—Geology of Minnesota, Bulletin No. 2, 1887, M. E. WADSWORTH: Building-Stone in the State of New York, J. C. SMOCK: Carboniferous Trilobites: Les Dislocations de l'écorce terrestre: Essai de Définition et de Nomenclature par EMM. DE MARGARIE et A. HEIM, 500.—Index der Krystallformen der Mineralien, 501.

Botany and Zoology—Flora of the Hawaiian Islands, W. HILLEBRAND, 501.—Recent Advances in Vegetable Histology, 503.—Forms of Animal Life, G. ROLLESTON, 504.—Die Japanische Seeigel von Dr. Ludwig Döderlein: Bibliotheca Zoologica, 505.

Miscellaneous Scientific Intelligence—Constant of Aberration: Discovery of Small Planets: Michigan Mining School, 505.

Obituary—GERHARD VOM RATH, 506.

INDEX TO VOLUME XXXV, 507.
